SUMMARY

MSc Data Science candidate at OsloMet with an MSc in Computer Engineering, focused on full-stack software and data solutions. Proven track record building web and mobile applications, backend services, and production data pipelines for enterprise and research environments. Published researcher with strong foundations in Python, modern JavaScript frameworks, and cloud platforms. Seeking roles where reliable engineering, clean architecture, and user-focused delivery matter.

SKILLS

Frontend & Mobile

- React, Next.js, JavaScript
- React Native
- UI/UX collaboration

Backend & Data

- Python, Java, C#, C++
- Spring Boot, REST APIs
- Apache Spark, SQL

Cloud & Tools

- AWS, Azure
- Docker, Kubernetes
- Git, CI/CD

EXPERIENCE

Teaching Assistant

Feb 2026 – May 2026

OsloMet (Oslo Metropolitan University)

- Teaching Assistant, ACIT4830 — Machine Learning for Robotics and Automation: assisted students with labs, exercises, and coursework
- Teaching Assistant, ACIT4290 — Practical Cyber Security: assisted students with labs, exercises, and coursework

Application Support Specialist

Feb 2025 – Jun 2025

C-Loop

Conducted ERP system testing and provided technical support for enterprise applications.

EDUCATION

MSc Data Science (in progress)

2025 – Present

OsloMet (Oslo Metropolitan University)

MSc Computer Engineering

2012 – 2017

Politecnico di Torino
